## Introduction :

Cryptocurrency is a medium of exchange that is digital, encrypted and decentralized. Unlike traditional currencies such as U.S. Dollar or Euro, there is no central authority that manages and maintains the value of a cryptocurrency. Instead, these tasks are broadly distributed among cryptocurrency users via internet.

Decentralized finance is a blockchain-based form of finance that does not rely on central financial intermediaries such as brokerages, exchanges, or banks to offer traditional financial instruments, and instead utilizes smart contracts on blockchains.

Braianut is a reflect token developed on Binance Smart Chain. A reflect fee is applied to all BRN transactions, and redistributes tokens directly to holders.

# Why Brainaut ?

Brainaut is a 3rd generation reflectionary, deflationary, yield Farm token. A 4% fee is charged for each transaction, 2 % of every BSC transaction is redistributed over all holders and the remaining 2% is burned.

Thus, Brainaut has the ability to reflect and burn tokens instantly. The total supply begins with 100,000,000 tokens, when the total supply reaches 10,000,000 BRN, fees will not be charged, to insure the Brainaut's durability on listing with a constant max supply of 10,000,000 tokens.

Brainaut DeFi project was audited before it went live on the BSC network showing to its investors that the code was secure. In addition, the liquidity provided on PancakeSwap was locked, thus providing a safe trading environment.

With Brainaut token there is no need to stake or lock up your tokens anywhere to receive rewards. Just hold tokens in your wallet and watch your balance increase.

# Tokenomics :

Brainaut Binance Smart Chain Tokenomics

**30% PRESALE**

**40% LIQUIDITY**

**14% FARMING REWARDS**

**8% MARKETING**

**8% DEVELOPER**

# Pre-sale & Instructions :

Brainaut has developed a pre-sale smart contract.

The smart contract will detect your address and will send you tokens at the price 1 BNB = 160,000 BRN.

Once you send the BNB to pre-sale smart contract you will automatically receive your BRN tokens in your wallet.

Pre-sale will be live for 7 days or the hard cap reach.

Listing on Pancakeswap and DODO immediately post pre-sale.

## Details :

TOTAL SUPPLY :	100,000,000 BRN
TOTAL PRESALE :	30,000,000 BRN
MIN 1 BNB =	160,000 BRN
MAX 10 BNB =	1,600,000 RBN
SOCFTCAP =	125 BNB
HARDCAP =	200 BNB

# Hold BRN Strategy:

Brainaut hold strategy is explained below:

After any transaction Brainaut charge 4% fee, 2 % of every BSC transaction is redistributed over all holders and the remaining 2% is burned.

If you buy 100 BRN, you will receive 96 BRN, 2 BRN will be redistributed to all holders in function of the amount BRN in their wallet, 2 BRN will be burned.

If you buy 1,000,000 BRN, you will receive 960,000 BRN, 20,000 BRN will be redistributed to all holders in function of the amount BRN in their wallet, 20,000 BRN will be burned.

The total supply begins with 100,000,000 tokens, when the total supply reaches 10,000,000 BRN, fees will not be charged, to insure the Brainaut's durability on listing with a constant max supply of 10,000,000 BRN.

# RoadMap :

## Conclusion :

Brainaut Bring a new model of yield farming, it is one of the most innovative DeFi Projects. With collaboration of blockchain experts There is great hope for the success of this project which brings added value in the world of DeFi.
